To work in your progressive organization that allows me the scope to update my knowledge to the latest trends and be part of a diverse and dynamic team that adds to both my personal and professional growth.

WORK EXPERIENCE

Software Developer
Pumpumpum

04/2022 - Present   Gurgaon

Achievements/Tasks
- Worked on the modular, single-page web application for pumpumpum.com using Angular, incorporating responsive design principles using Tailwind and Bootstrap.
- Contributed to the development of the pumpumpum admin dashboard, creating numerous new modules from scratch to facilitate seamless operations and efficient data handling.
- Created a Blog Management System with Angular, integrating an intuitive dashboard for content uploading and dynamic website views for display.

Software Developer Intern
Equitrax Corporate Ventures

02/2022 - 03/2022   Gurgaon

Achievements/Tasks
- Developed and launched the organization's official website utilizing HTML, CSS, Bootstrap, and JavaScript. Successfully integrated modern design principles and responsive layouts to enhance user experience.
- In addition, initiated and completed a project focused on data visualization by harnessing the power of the Google Maps API and JavaScript. The project involved displaying intricate data sets on an interactive map interface.

EDUCATION

MCA
Quantum University, Roorkee

08/2020 - 06/2022   Roorkee

SKILLS

Angular   Typescript   Javascript

HTML   CSS   Wordpress   SQL   GIT

Bootstrap   Tailwind   RxJS   JQuery

Node   RestfulAPI

PERSONAL PROJECTS

Angular Dashboard
- Developed a basic modular Angular dashboard with CRUD operations that can be seamlessly integrated into users list or any other list of items.
- https://github.com/rashika-svg/Angular-crud

Contact Management App
- Feature-rich CRUD application using Angular and Tailwind CSS for contact details management.
- The app allows users to CRUD contact information. It includes a recycle bin feature, providing the option to permanently delete or restore contacts.
- .The app's responsive design ensures a seamless user experience across devices.
- The backend is powered by a JSON server, ensuring efficient data storage and retrieval.
